

Your Spinal Cord Injury

(Self-Report)

Spinal cord injury and recovery can be different for each patient depending on the location of the injury, its severity and whether other medical conditions are present. The Ranken Jordan team will work with patients and caregivers to ensure that they understand their injury and know what to expect during rehab and recovery. To help provide you with the most appropriate education, please tell us what you know so far.

What do you know about your spinal cord injury? Who provided you with that information?

Has anyone described the details of your spinal cord injury? (Complete or incomplete? Level of injury?)

Has anyone told you what amount of recovery is expected? If yes, what did they tell you?

Have you received education on any precautions to be aware of following a spinal cord injury?

Is there any specific information that you are wanting/needing about your injury that you have not yet received?

Your Spinal Cord Injury

(Caregiver Report)

Spinal cord injury and recovery can be different for each patient depending on the location of the injury, its severity, and whether any other medical conditions are present. The Ranken Jordan team will work with patients and caregivers to ensure that they understand their injury and know what to expect during rehab and recovery. To help provide you/your child with the most appropriate education, please tell us what you know so far.

What do you know about your child's spinal cord injury? Who provided you with that information?
